

Assignment – 2

- Connect to the Store Sales Data and do the following: -
- Remove all the blank rows.

The screenshot shows the Power Query Editor interface. The main area displays a table with columns: Row ID, Order Priority, Discount, Unit Price, Shipping Cost, Customer ID, and Customer Name. The table contains 28 rows of data. The 'Applied Steps' pane on the right shows the following steps: Source, Navigation, Promoted Headers, Changed Type, Removed Top Rows, Promoted Headers1, Changed Type1, and 'Removed Blank Rows' (which is highlighted). The 'Properties' pane on the right shows the 'Name' property set to 'Orders'.

- Update the column header if they are not updated

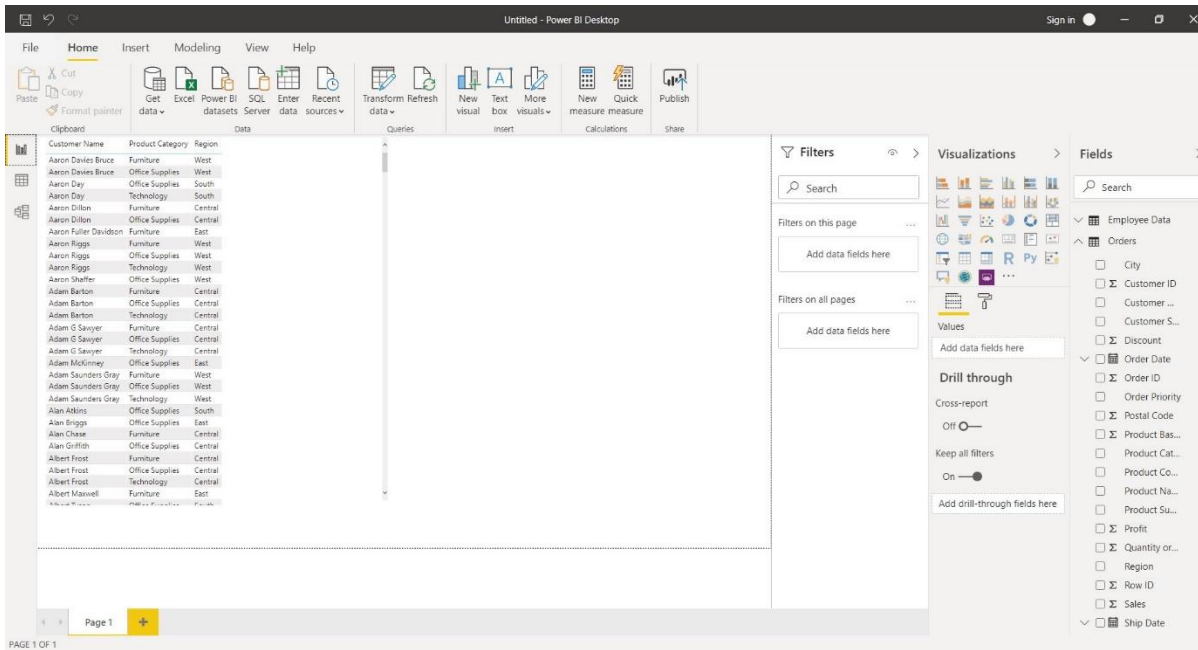

This screenshot is identical to the one above, showing the Power Query Editor with the 'Removed Blank Rows' step highlighted in the 'Applied Steps' pane. The table data and the 'Properties' pane remain the same.

– Create a text table and show the sales in terms of

o Customers

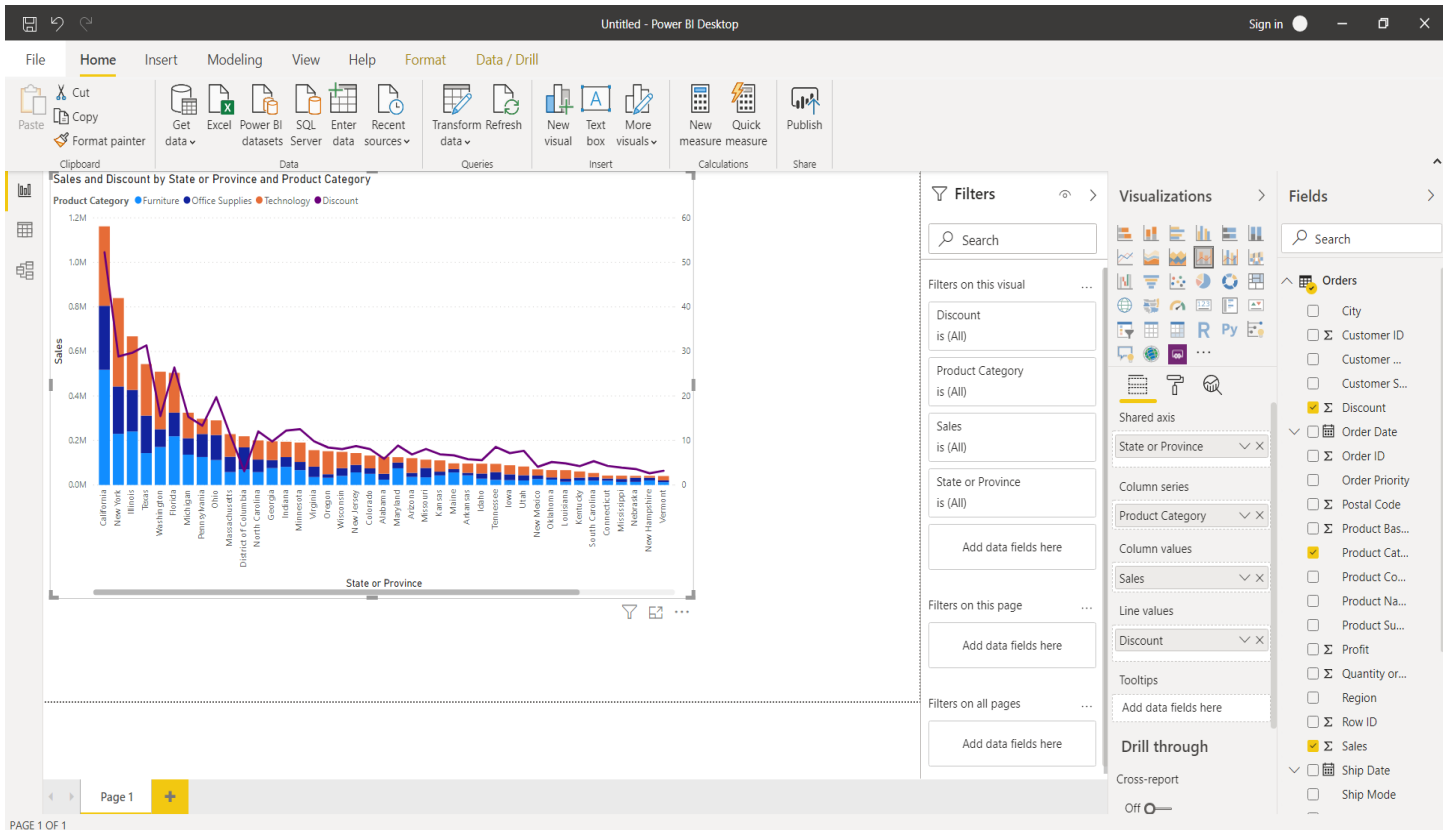

o Product Category

o Regions

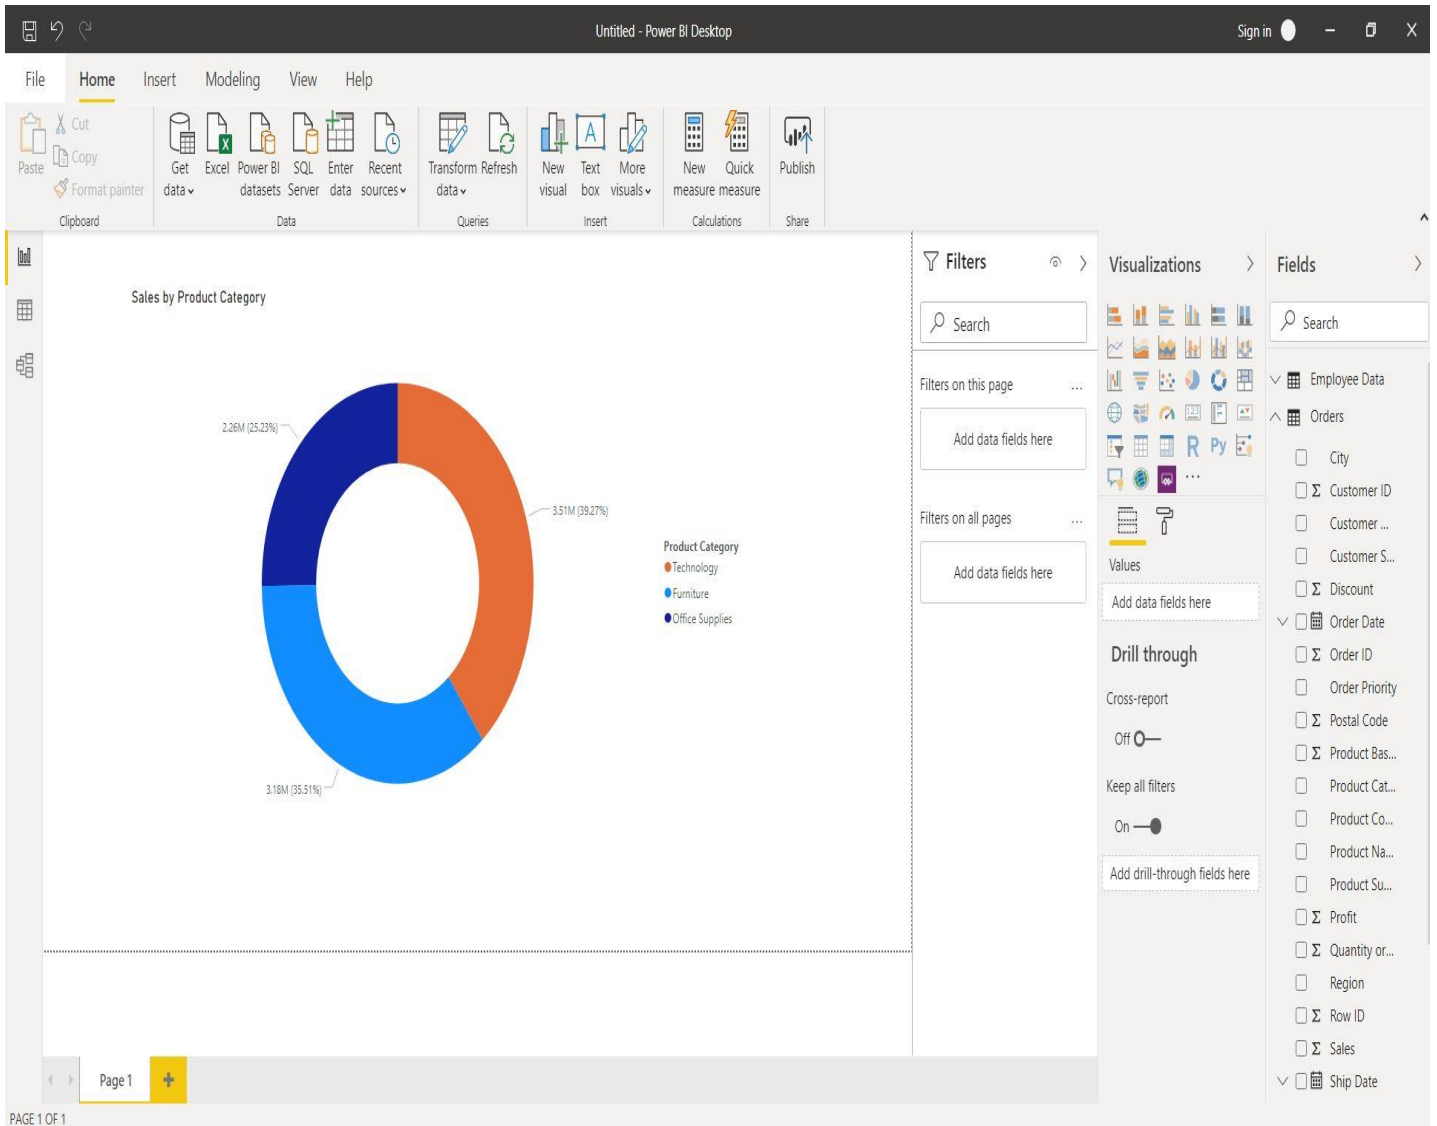

Create a line and Clustered Column Chart showing the Sales and Discount as per the State or Province

- Format the bars and line with different colors
- Which state has the highest sales in terms Technology

• Create a Donut Chart showing sales in terms of Product category
